Dr. A. Senyon Tatus

President

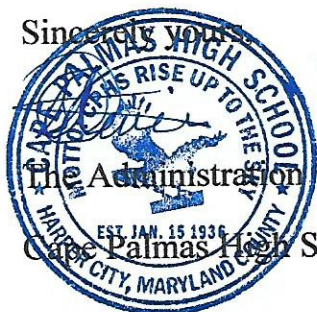

Cape Palmas High School Alumni Association USA. INC

Dear Dr. Tatus:

As you are aware, the water system at the school is very poor and has become unbearable. This situation is created by lack of water system on campus. Students and janitors get water from far distance to the campus and the only nearby well that could be used to supply water in the building is not protected due to lack of security to guide the submersible pump and pipe outside the campus.

In view of this situation, we are appealing to CPHSAA-USA to finance the digging of well on the campus. We hope that if this appeal is accepted, it will ease burden of getting water on campus.

Sincerely yours,

The Administration

Cape Palmas High School
